

Use and application of the electronic signature

In line with the ICT law (*Article 146:*), electronic signature is legally accepted if:

1. the method used indicates the originator of the record and that the originator approves the information contained in the record.
2. that method is reliable for the purpose for which the electronic record was generated or communicated, in the light of agreement.

According to the above description, the legally accepted electronic signatures are the Qualified Electronic Signatures i.e., the Digital signatures provided by service providers accredited by the Regulatory Authorities. The qualified electronic signature (Digital signature) fulfils the requirement to be related to the electronic signature admission.
