

Email Accounts

Official Government of Rwanda (GoR) employees as well as administrative visitors of departments must request for a generic user account to facilitate operations and communications. A request must be made to IT departments. Generic accounts created are not to be linked to a personal account (i.e. gmail, yahoo, etc.) Email accounts will be vetted so as not to include names that are associated with other departments for example: helpdesk (IT Services);

All email accounts belonging to government institutions must have a domain with a suffix of gov.rw e.g. @risa.gov.rw.
